WHAT IS PREZI?

- ✓ Prezi is an online, flash-based presentation creator and storytelling tool.
- ✓ This cloud based software allows its users to zoom in and out of their presentations.
- ✓ Prezi provides the same functionalities as other presentation programs such as Power Point or Apple Keynote.

PREZI vs. POWERPOINT

| | PREZI | POWER POINT |
|-------------|------------|-------------|
| Navigation | Non-linear | Linear |
| Layout | Map | Slide stack |
| View change | Zoom/pan | Reveal |
| Based | Web | Computer |
| Printing | Basic | Advanced |

HOW DOES PREZI WORK?

Prezi offers a variety of tools to make your presentation more interesting than a regular Power Point presentation:

- ✓ **PAN AND ZOOM** : with panning and zooming navigation you can get a more cinematic view than with a two-dimensional presentation software.
- ✓ **THE PREZI ZEBRA** (blue circle): this is an object manipulation icon for resizing, rotating or editing an object.
- ✓ **FRAME**: this tool lets you present all your objects together, as one slide.
- ✓ **PATH**: connect your presentation objects with each other.
- ✓ **THE PREZI CANVAS**: an open space where you can place and navigate between content such as text, images and videos.
